

Enhanced is ready for growth

After one of its most successful years to date, Enhanced has even more ambitious plans for 2014 and beyond. The economic outlook is certainly looking the most positive it has been for a long time and Enhanced believes that companies must be ready to embrace this growing confidence in the market place.

Enhanced is widely recognised as being one of the leading and fastest growing IT companies in the south. The team at Enhanced work with companies who believe that IT is at the core of their business and imperative to help achieve their planned growth and potential.

Why has Enhanced been so successful over the last few years?

Three of its longest standing employees, all celebrating 15 years with the company, summed up their reasons for Enhanced's continued growth and success.

Andrew Oborn
Applications Development Manager

Being a total solutions provider, our strength is in the ability to deliver a solution that scales to the customer's specific requirement – from the small business payroll only system to corporate solution, including network infrastructure, accounts, payroll, costing, integrated e-commerce or custom industry specific requirements.

Phil Moorey
Applications Consultant Manager

As a team we have years of experience, and we use this experience to the benefit of our customers. Most queries and concerns we have come across and overcome. Our in depth analysis of each and every business we work with will ensure that our solutions meet and fit exactly with a company's requirements.

Paul Warwick
Applications Support Manager

Enhanced is all about people. I work with an amazing team; we are National award winners for our customer service. It is extremely rewarding for our customers knowing that we are there for them every step of the way and continue to be there for them once our solutions have been installed. Whatever their concern or query we can help and want to provide them with the best support available.

Plans for 2014

Enhanced is constantly keeping up to date with latest innovations and industry developments. The team measure their success by the success they can bring to the companies they work with. They feel the time is right to invest in marketing and plan to continue to improve the support and services they offer their existing and new customers.

Simon White

'It has been a great year,' says Simon White, Managing Director. 'We have recorded record figures, increased our work force by 25% and won some major new clients. Although we are ready and planning for growth, we remain totally committed to our existing customers and continue to invest so we can help them achieve their goals and further success.'
